\* Heat Resistant Fiber:  
Tony of Beverly's heat resistant *Ambient* Fiber is designed to withstand heat up to 350 degrees. You can easily achieve different looks using a temperature controlled (240-350 degrees) flat iron or curling iron. After using your iron to straighten or curl, allow the fiber to cool for 60 seconds to set style before combing through the fiber. The style stays locked in place until heat-styled again. Please check the settings on your heating appliance before applying heat to the fiber. We recommend heat styling off of the head for safety.

Amaretto
